

ENTERPRISES PTY LTD

company profile

DAC Enterprises Pty Ltd Capability Statement

DAC Enterprises Pty Ltd is a privately owned civil engineering and construction company based in Darwin, Northern Territory, Australia.

Formed in 1987, DAC Enterprises Pty Ltd has built an enviable reputation for reliability and service throughout the Northern Territory, North Western Australia and also in East Timor during the Australian assisted nation building activities.

We offer quality civil construction services to government departments and private enterprise in both urban and remote locations, gaining a significant proportion of our business through competitive government and private tendering systems.

DAC Enterprises Pty Ltd recognises the value of pooling resources with specific technology suppliers and construction specialists and also with established local contractors to augment the skills and expertise that already exist within the company. The foundations of our company are forged in civil engineering, contract management, project administration and the vast construction experience of our core group of professionals, supervisors, plant operators and tradesmen.

Our civil engineering experience and capabilities include:

Roads and Airstrips - construction, rehabilitation and maintenance services to private and public enterprise clients for infrastructure and development projects in urban, rural and remote locations

Materials Haulage - our fleet of prime movers and side tippers has the capacity to handle significant quarry materials haulage projects, as well as complimenting the company's in-house civil construction operations.

Residential and Industrial Subdivisions - provision of all aspects of subdivision works from conceptual analysis, design, engineering, management, coordination through to construction in remote and urban areas.

Barge Landings and Boat Ramps - we have a very resourceful approach in tackling projects in logistically difficult locations and our local knowledge of the harbours and rivers in the Tropical North has provided DAC Enterprises Pty Ltd with the requisite experience necessary to successfully complete marine infrastructure projects without the drama.

Stormwater Drainage - DAC Enterprises Pty Ltd has the expertise and local knowledge to deliver sound drainage solutions for subdivision and other civil project works to effectively overcome the extreme climatic conditions created during regular intense rainfall periods that occur over several months of the year in the Tropical North of Australia.

Sewer and Hydraulic Services - complete project delivery of sewer and hydraulic services for urban and remote communities is a hallmark of our growing company. We have significant experience in constructing sewerage schemes to serve entire communities incorporating gravity mains, access chambers, service connections, pumping stations, overflow storage tanks, rising mains, sewerage lagoons and evaporation ponds. As would be expected, we have similar experience in the area of provision of potable community water supply systems incorporating equipping bores, constructing stainless steel delivery pipework, rising mains, water storage tanks, and installation of packaged water pressure pumping systems.

Demolition and Dismantling - this facet of DAC Enterprises Pty Ltd's comprehensive range of civil construction services is steadily gaining prominence and we anticipate progressively increasing our market share in the coming years. We offer a total demolition and/or dismantle and removal service. In projects where the demolition works by mechanical plant needs to be supplemented by explosives and where asbestos removal is necessary, we utilise the expertise of specialist company's with the requisite insurances, licences, management systems and experience.

Track Record

DAC Enterprises Pty Ltd has a track record that confirms our ability to successfully complete civil construction projects whatever the environment. Our construction solutions are packaged to meet Client's requirements and expectations. Our commitment to quality outcomes and the development of excellent client relationships are key strategies of the company to ensure repeat business and superior project delivery.

Stuart Highway Duplication **\$2.6 M**

Construction of 4.6 km of dual carriageway national highway.

Manthalpe Subdivision **\$1.5 M**

Provision of services to a 24 lot residential subdivision including roads, electrical reticulation, stormwater drainage, water and sewer services.

Batchelor Road Reconstruction **\$500 k**

Reconstruction of 2.1 km of single carriageway main road

Borroloola Sewerage Upgrade **\$2.2 M**

Construction of 4.4 km of gravity sewer main, concrete sewerage overflow storage tanks and a sewerage pumping station.

Rosebery Sewerage Pumping Station **\$850 k**

Construction of sewerage pumping station, concrete sewerage overflow storage tank and sewer rising main.

Imanpa Sewerage Scheme **\$1.9 M**

Construction of 3.4 km of gravity sewer main, 1.5 km of sewer rising main and 2 sewerage pumping stations.

DAC Enterprises Pty Ltd Management Systems

DAC Enterprises Pty Ltd is committed to achieving and maintaining industry best practice standards and accordingly has implemented the following management systems:

Quality Assurance

The primary goal and policy of DAC Enterprises Pty Ltd is to undertake and complete projects of high quality to the satisfaction of our clients. The Company is committed to pursuing improvements in quality, efficiency and client satisfaction. We believe that our company's future success is dependent on client satisfaction, and we are committed to assuring the quality of the completed product through the provision of a quality system.

The DAC Enterprises Pty Ltd Quality Manual outlines the Company's quality system and how it is structured, implemented and maintained in order to guarantee that projects are completed to specified requirements and quality standards. Our management personnel support the quality system and are committed to its successful project implementation and maintenance.

The quality system has been designed generally in accordance with AS3902/NZS 9002. DAC Enterprises Pty Ltd is currently moving towards full third party QA accreditation.

Human Resources

The DAC Enterprises Pty Ltd human relations' philosophy stems from our belief that our strength is our people.

We achieve industrial harmony through sound human relations' practices and attention to a safe and healthy work environment. We strive for openness and honesty in our communication and dealing with people. We develop the skills of employees and seek to meet their aspirations.

DAC Enterprises Pty Ltd strongly supports the principles of Equal Employment Opportunity and has in place an Equal Employment And Elimination of Discrimination/Harassment Policy.

Occupational Health and Safety

Our objective is to provide a safe and healthy work environment for all employees. We consider this to be fundamental in preventing the occurrence of workplace injuries and illnesses. Our goal is zero reportable injuries and illnesses associated with our places of work.

Although DAC Enterprises Pty Ltd has an enviable company safety record, we recognise that as the company grows it is important that we do not become complacent in the application of occupational health and safety policy and keep abreast of new developments and initiatives in the field. In this way we shall continually seek to improve our occupational health and safety standing within the industry.

Time Management and Cost Control

Our approach to project management is such that both time and cost control are fundamental parts of the overall project management process. Commencing with the initial tender analysis phase, through the construction phase to final project completion, all planning, resource management, task allocation, time management and cost control aspects of the project are tracked and recorded on computer based programs to ensure the most time and cost effective way to complete a quality project is adopted and maintained.

Aboriginal Employment and Training

The civil construction industry in which DAC Enterprises Pty Ltd is engaged frequently operates in remote areas of the Northern Territory and other logistically difficult parts of Australia. In this regard, many projects interface with the needs and values of Aboriginal people and their communities. Civil construction projects such as roads and other transport infrastructure works, mining operations, community water and sewerage and other essential services works thus involve, or have the potential to involve, Aboriginal communities.

DAC Enterprises Pty Ltd recognises the rights of Aboriginal people to be involved in projects that are conducted on their land, in their communities and in areas of social and cultural significance to them.

DAC Enterprises Pty Ltd has an excellent record in the area of training Aboriginal people in civil construction plant operation. During past projects, trainees that have been selected in consultation with community representatives, become involved in all facets of construction work available under the project.

Environmental Management

The environment and its protection is a prime concern for DAC Enterprises Pty Ltd. As with improvements in the areas of occupational health and safety, quality, and Aboriginal employment and training, DAC Enterprises Pty Ltd recognises that meeting this concern is fundamental to its ongoing business success and demands a high standard of environmental management on every contract.
